> *Staff PM with end-to-end ownership of Kubernetes, AI agent infrastructure, and internal developer platforms—combining technical product depth, hands-on prototyping, and measurable outcomes at enterprise scale.*

## EXPERIENCE

### Staff Product Manager, AI-Native Developer Platform

Jan 2025 – Present

**INTUIT (TURBOTAX, QUICKBOOKS, MAILCHIMP, CREDIT KARMA) · MOUNTAIN VIEW, CA**

*Sole PM setting strategy, roadmap, and outcomes across Kubernetes orchestration, compute and autoscaling, secure agent runtime, and incident response for 35+ engineers and ~10K internal users.*

- Owned Kubernetes orchestration and intelligent autoscaling across 113 clusters, 1,500+ services, and $50M+ cloud spend; shaped CRD-based control-plane behavior, Karpenter node provisioning, workload scaling, APIs, and operator workflows
- Led workflow observation and 5+ Follow Me Home sessions, then shipped autoscaling improvements that reduced infrastructure cost 15%+ and saved 1,000+ engineering hours while preserving peak-season reliability
- Launched an internal MCP platform and agent-executable skills, turning fragmented Kubernetes and SRE workflows into governed self-service products for ~10K employees
- Defined the productization path for a Kubernetes-based agent runtime and secure sandbox (gVisor + Cilium eBPF), including architecture requirements, SDK and onboarding design, adoption criteria, and success measures
- Prototyped agent workflows using Claude Agent SDK, MCP, Python, and retrieval patterns to validate user journeys before engineering investment; converted validated designs into PRDs and platform roadmaps
- Designed a hybrid incident workflow from analysis of 2,266 support messages, combining deterministic RCA routing with specialist agents; led build-vs-buy and inference-cost decisions that secured FY27 platform investment

### Senior Product Manager (Engineering)

2020 – 2024

**CISCO SYSTEMS · SAN JOSE, CA**

*Owned product strategy and roadmap for HyperFlex, Cisco's $400M ARR infrastructure platform with 20K+ managed servers; promoted to Senior PM in 2 years.*

- Pioneered internal LLM products in Cisco's Cloud and Compute business: shipped GPT-based Text2SQL and Python analytics workflows that cut quarterly business review preparation time 70%
- Led discovery and delivery of an internal RAG assistant for sales renewal workflows; defined the retrieval design, data governance guardrails, rollout approach, and cross-functional operating model
- Directed pricing analytics and BI products, using ML segmentation, what-if modeling, and A/B experimentation to generate ~$20M in annual impact (~5% margin improvement)
- Shipped SaaS management capabilities to 2,000+ enterprise accounts and built real-time operational intelligence from zero across Kafka, ELK, Snowflake, and Tableau
- Set product vision for Kubernetes and DevOps services on HyperFlex; secured certified partnerships with Google Cloud Anthos and Red Hat OpenShift and presented the roadmap to 10K+ customers and partners

### Senior Consultant, Technology

2014 – 2018

**ACCENTURE**

*Enterprise product strategy for ByteDance / TikTok, SAP, Huawei, HTC, and Lenovo; Top Performer for 3 years.*

- Advised ByteDance / TikTok executives on content governance as the platform scaled to hundreds of millions of users; created the global moderation policy and used 300+ escalation cases to improve AI classification accuracy 10%
- Led workflow research and product design for 3 SAP Cloud ERP finance applications serving 200K+ users; defined a phased SaaS roadmap with measurable activation milestones adopted by executive leadership
- Co-led a $4M digital supply-chain transformation for Huawei, designing an enterprise architecture deployed across 50+ engineering teams
- Built an analytics and validation framework for HTC's service operations, detecting 12% fraudulent orders across 30K+ daily claims and delivering $3M in savings

## SKILLS

**Kubernetes & Orchestration:** Kubernetes, CKA Certified, Karpenter, VPA/HPA, CRD-based controllers, Workload scheduling, Node provisioning, gVisor, Cilium eBPF, Istio, AWS EKS, GCP GKE

**AI & Agent Systems:** MCP, Claude Agent SDK, OpenAI, Python, Agentic orchestration, Multi-agent design, RAG architecture, Secure agent runtime, Governed tool use, Human-in-the-loop design

**Product Leadership:** Portfolio strategy, Roadmap prioritization, Workflow discovery, Jobs-to-be-done, PRD authorship, Build-vs-buy, Executive decision memos, Adoption & change management

**Outcomes & Analytics:** OKRs & success metrics, ROI modeling, A/B experimentation, SQL, Snowflake, Tableau, Operational analytics

**Infrastructure Product Quality:** API design, Lifecycle & failure-mode analysis, Reliability, Observability, Incident response, Capacity planning, DevOps, AIOps

## EDUCATION

**UC Berkeley, Haas School of Business, MBA, 2020**

International Office Award · Foxconn Scholarship · VP, Haas Tech Club · Student Instructor of PM & Data Analytics

**National Taiwan University, MS, Computer Science and Electrical Engineering, 2013**

**National Tsing Hua University, BS, Computer Science & Quantitative Finance, 2011**

**Continuing Education**

Claude Certified Architect · Reforge: Product Strategy, Experimentation · Coursera: Deep Learning, GenAI with LLMs

## COMMUNITY & CONTENT

Organizing team, GenAI Summit SF | Presenter, Kubernetes Community Days SF Bay Area 2025 | Conference Speaker, Cisco Live | Board Member, NATEA | Cal Hackathon Mentor, UC Berkeley | 30K+ social / fanpage followers
